

## Young Researchers' Committee in Catalysis Society of Japan Young Researchers' Mixer 2022

**Organizer** Young Researchers' Committee in Catalysis Society of Japan

**Event date** Sep. 26<sup>th</sup>, 2022, 18:30~20:30

**Holding format** Online mixer ( held over zoom)

**Abstract** Young Researchers' Committee in Catalysis Society of Japan will hold the Young Researchers' Mixer 2022. For the first time, we give a short talk entitled “New trend? What is the DX in research?” followed by a group discussion. We hope this event will become a good opportunity to re-consider your research lives by touching on a cutting-edge topic and participating in a group discussion. We will also hold a social gathering. Various people including master’s students, doctoral students, postdoctoral researchers, assistant professors, researchers in the company, and researchers in national institutes will join this mixer. Therefore, it should be fruitful for you all to chat with people you seldom have a chance to communicate with. We look forward to your participation!

### Program

**18:15~18:30**      **Opening site (zoom)**

**18:30~18:50**      **Short talk** “New trend? What is the DX in research?” (provided in Japanese)

National Institute of Advanced Industrial Science and Technology (AIST)    Artificial Photosynthesis Research Team, Global Zero Emission Research Center (GZR)    Dr. Masanori KODERA

**18:50~19:0**      **Group discussion**

(Free discussion using breakout rooms in zoom. Members will be randomly chosen)

**19:05~19:35**      **Themed mixer**

You can join breakout rooms that you are interested in. Topics will be decided by a pre-questionnaire. (e.g. “Doctoral course”, “Research in university and company”, “National institute”, “Study abroad”, “Machine learning”, “Free talk”.)

**19:35~20:30**      **Online social gathering**

**Entrance Fee**      Free
